Xolair[®]
(omalizumab)

Instruction video for self-injection (pre-filled syringe)

Xolair® (omalizumab) is used for the treatment of:

Allergic asthma: This medicine is used to prevent asthma from getting worse by controlling symptoms of severe allergic asthma in adults, adolescents and children (6 years of age and older) who are already receiving asthma medicine, but whose asthma symptoms are not well controlled by medicines such as high-dose steroid inhalers and beta-agonist inhalers.

Chronic spontaneous urticaria (CSU): This medicine is used to treat CSU in adults and adolescents (12 years of age and older) who are already receiving antihistamines but whose CSU symptoms are not well controlled by these medicines.

Welcome

Instructions for use of
Xolair® (omalizumab)
pre-filled syringe

This video is intended for patients already prescribed Xolair.

Reporting of side effects

If you get side-effects with any medication you are taking, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in the information leaflet that comes in the pack. You can report side effects via the Yellow Card Scheme at www.mhra.gov.uk/yellowcard. By reporting side effects, you can help provide more information on the safety of your medication.

VIDEO

A short video to support you to inject your Xolair at home, once you've been trained by your healthcare provider. You can read more about Xolair and how to use it in the [patient](#)

[information leaflet \(PIL\)](#). This link will take you to the electronic medicines compendium (emc) website, which is a non-Novartis website.*

*The PIL is the leaflet included in the pack with a medicine. It is written for patients and gives information about taking or using a medicine. It is possible that the leaflet in your medicine pack may differ from this version because it may have been updated since your medicine was packaged.
