Cosentyx® (secukinumab): UnoReady® 300 mg injection video

Cosentyx is indicated for the treatment of moderate to severe plaque psoriasis (PsO) in adults, children and adolescents from the age of 6 years who are candidates for systemic therapy; active psoriatic arthritis (PsA) in adult patients (alone or in combination with methotrexate [MTX]) when the response to previous disease-modifying anti-rheumatic drug therapy has been inadequate; active ankylosing spondylitis (AS) in adults who have responded inadequately to conventional therapy; active nonradiographic axial spondyloarthritis (nr-axSpA) with objective signs of inflammation as indicated by elevated C-reactive protein and/or magnetic resonance imaging evidence in adults who have responded inadequately to non-steroidal anti-inflammatory drugs.[1,2]

Full indication for Cosentyx can be found here

Do not share screenshots or links to this website, video with patients, as this website is intended for healthcare professionals only. If you do wish to share a video with patients who have been prescribed Cosentyx, please share this link:
